# FOREST TREE SEEDLINGS - - - COLLECTED

This stock is not Nursery grown but is woods grown collected from the mountains and forests.

Woods grown or collected stock is not to be classed with Nursery grown or cultivated plants. You will notice that in this List, as has been our rule that the Nursery Grown and Collected stock are listed separately and under their respective heading. We seldom recommend Collected Stock, however many of our customers advise us that with Collected Stock they have obtained satisfactory results. The prices are certainly attractive. We frankly state that we believe that the Nursery Grown Stock is well worth the difference in price. Many of the varieties we offer in Collected Stock are items that frequently become short in Nursery Grown, hence the Collected list, but do not expect the Collected Stock to have as good root system, be as well developed or live as well as Nursery Grown. Our prices are made after careful study and we believe them to be, not only in line with the trade generally, but that we have a quality well worth the price.

Note—Most collected seedlings, such as Maples and some others, except large sizes, are crooked near the ground and should be cut back to crown before planting. They grow up straight, smooth and much faster and quicker than when planted without cutting back. We cut back all seedlings to crown before transplanting.

## ACER Saccharum. Sugar Maple or Hard Maple.

	Per 100	Per 1000
6 to 12 inch (s).....	\$ .65	\$ 4.00
